RELAYQO · MARKETING PLAN · LAUNCH

Getting your first 3 paying shops

The plan we agreed on, step by step, built around your 8:00–17:00 job. Based on the 7 conversations your ads brought in (none was a shop owner) and your answers to the plan.

3 paying shops
by week 6, each with a real testimonial

10 messages a day
personal, at lunch

~10 h a week
evenings, lunch and Sunday

1. Who you sell to

Instagram shops selling clothes, cosmetics or perfume, in Casablanca and Rabat first. They get the same questions all day ("ch7al taman?", "kayn size 38?", "livraison l Tanger?"), the owner answers the messages and decides, and you can reach them by message outside your work hours. Stay on this one niche for 6 weeks.

Your promise, everywhere: "Your customers get an answer in 10 seconds, in Darija, even at midnight, so you stop losing sales to slow replies."

2. The offer

PLAN	LAUNCH PRICE	WHAT'S IN IT
Basic	249 MAD / month	1 WhatsApp number, answers in Darija, collects orders
Premium	449 MAD / month	Instagram DMs and up to 2 WhatsApp numbers (QR connection once tested)

- **Preview before paying:** you set the assistant up on their products; they test it as if they were a customer, before it answers any real customer and before they pay.
- **Launch price:** say it's the price for the first clients. Optionally promise they keep it for 6–12 months.
- **Referrals:** one free month for each shop a client brings who signs up.
- **Pick the plan with one question:** customers ask on WhatsApp only → Basic. Instagram DMs or both → Premium.

Check that 249 MAD covers what one client costs you (WhatsApp fees, AI usage, your hour of setup). If most shops take orders in Instagram DMs, consider moving Instagram into Basic.

3. Your week

WHEN	WHAT	GOAL
Sunday, 2 h	Build the list of 50 shops in the niche (number published in their Instagram bio or Google Maps). Record 3 short videos.	50 shops
Lunch, 20–30 min	Send personal messages, one per shop, written for that shop.	10 / day
During work	Take short 10-minute calls when you can step out of the office.	1–2 calls
17:30–20:00	Reply to everyone, call the interested ones, set up previews.	2–3 previews / week

Keep no more than **5 previews running at once**: you set each one up yourself.

4. What to say

First message to a shop

سلام 👋 شفت المحل ديالك، الحوايج زوينين. سؤال صغير: شحال من ميساج كيجيك فالنهار ديال "شحال الثمن؟" و"كاين المقاس؟"؟ عندنا مساعد كيجاوب الكليان ديالك بالدارجة فـ10 ثواني، حتى فالليل. إلا بغيتي، نوجدو ليك المساعد على المنتوجات ديالك وتجربو قبل ما تخلص.

Follow-up after 2 days: a short video of the assistant answering a shop like theirs, and "no problem if you don't have time now".

When they reply

1

Relayqo كيجاوب الكليان ديالك فالواتساب والإنستغرام بالدارجة فـ10 ثواني، حتى فالليل، وكيجمع ليك الطلبيات. شنو كتبيع؟

What it does, then: what do you sell?

2

الكليان ديالك كيسولوك فالإنستغرام، فالواتساب، ولا بجوج؟

Instagram, WhatsApp, or both? This decides Basic or Premium.

3

تقريباً شحال من ميساج كيجيك فالنهار؟

About how many messages a day?

4

صيفط لينا شي تصاور وأثمنة ديال المنتوجات ولا الإنستغرام ديال المحل، ونوجدو ليك المساعد ديالك.

Send us photos and prices, or your shop's Instagram, and we'll build your assistant.

5

إمتى يناسبك يعيط ليك واحد من الفريق ديالنا 10 دقايق؟

When would suit you for a 10-minute call from our team?

6

كيبدا من 249 درهم فالشهر، وكنوريوك المساعد ديالك على المنتوجات ديالك قبل ما تخلص.

Price, when asked: from 249 MAD a month, and they see their assistant before paying.

Common objections

"I answer the messages myself."	Yes, but not at 1 a.m. or during the Friday rush. That's where sales get lost.
"AI makes mistakes."	It only answers from your own information. Anything it doesn't know comes to you. And you test it before it answers anyone.
"Too expensive."	One extra sale a week already pays for it.

5. Your Relayqo WhatsApp number

When someone writes to your Relayqo number, the bot welcomes them, shows what it does, asks what they sell and where their customers write, then says the team will contact them and **hands the conversation to you**. You get a notification on your phone ("Customer needs you") and reply yourself. The bot stays quiet in that conversation.

Turn on phone notifications (Android, once)

1. On your phone, open **Chrome** and go to **app.relayqo.online**. Sign in to your Relayqo account.
2. Tap **Enable alerts** in the top bar, then **Allow** when Chrome asks.
3. The button changes to 🔔 **Alerts on**. Keep Chrome allowed to send notifications (Android settings → Apps → Chrome → Notifications).
4. Test it: from another phone, write "salam" to your Relayqo WhatsApp number. You should get a notification within about 10 seconds.

> If it says **"Push notifications are not configured yet"**, the push keys are missing on Render. On your computer run `npx web-push generate-vapid-keys`, then in Render → relayqo-backend → Environment add `WEB_PUSH_PUBLIC_KEY` and `WEB_PUSH_PRIVATE_KEY` with those values, save, and wait for the redeploy. Keep the private key secret.

6. Rules to protect your number and your name

- **10–15 new chats a day at most.** Mass messages to strangers get WhatsApp numbers banned.
- **Collect the list by hand.** Only numbers shops publish for business. Scraping Instagram breaks Meta's rules, and personal numbers are protected by Moroccan law 09-08.
- **Stop when someone says no.**
- **No invented testimonials.** They're illegal in Morocco (loi 31-08) and against Meta's ad rules. Use real proof instead: your demo shop clearly labelled as a demo, your test results on real Darija questions, and your first real client.

7. Track every Sunday

WEEK	MESSAGES SENT	REPLIES	CALLS	PREVIEWS	PAYING
1					
2					
3					
4					
5					
6					

- **Weeks 1–2:** about 100 messages → ~20 conversations → 5 previews.
- **Week 6:** 3 paying shops with testimonials.
- **If after 150 messages you have fewer than 3 previews,** change the message or the niche, not the product.

8. When to turn the ads back on

Only after 3 real testimonials. Then: one niche, your promise line, the 249 MAD price, a pre-filled message that filters people ("I have a shop and want to see how it works"), and target people who watched your videos.

9. This week's checklist

☐ Turn on phone notifications and test them with a second phone.
☐ Sunday: list 50 clothing, cosmetics or perfume shops with a published number.
☐ Record 3 short Darija videos of the assistant answering a shop's customer.
☐ Monday to Friday: 10 personal messages at lunch, replies and calls in the evening.
☐ Set up your first 1–2 previews.
☐ Test the QR connection before selling Premium with it.
☐ Sunday: fill in the tracking table.
